

NEW &  
IMPROVED!

# CS-1, CS-2 AND CS-3 FLOOD PREVENTION SWITCHES

## PIPE SWITCHES

DiversiTech's new and improved primary and auxiliary flood prevention switches provide installers with:

- Small size for serviceability
- A pull-to-test lever for verifying correct installation
- An integrated LED light indicator that notifies homeowners and technicians activation occurred
- A versatile and durable design
- An internal surge protector eliminating the risk of inadvertent shutdowns

CS-1

CS-2

## PAN SWITCHES

CS-3

COMING  
SOON!

The CS-3 is a new and improved pan flood prevention switch that is easy to install anywhere on the drain pan. After clipping the CS-3 to the drain pan wall, the activation level can be easily adjusted by moving the nuts on the threaded shaft.

All pipe and pan switches comes with the proven magnetic reed float design along with six feet of wire for more flexibility in installation.
